**Advice for firefighters**

Use water spray to cool fire exposed surfaces and to protect.

Runoff from fire control materials or dilution from entering into waters, sewers or drinking water supply.

Firefighters must use a standard protective equipment, including helmets with face protection and self-contained

breathing protection equipment (SCBA).

**Protective equipment:** Put on breathing apparatus.

**Additional information:**

Cool containers at risk with water spray jet.

Danger for bursting of aerosols when heated for more than 50°C.

Aerosols that burst in fire can be mightily shot away.

#### 6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

Wear protective equipment. Keep unprotected persons away.

Ensure adequate ventilation

Keep away from ignition sources

Bring persons out of danger.

**Environmental precautions:**

Do not allow product to reach sewage system or water bodies.

Prevent material from reaching sewage system, holes and cellars.

Inform respective authorities in case product reaches water or sewage system.

Dilute with much water. Prevent from spreading (e.g. by damming-in or oil barriers).

**Methods and material for containment and cleaning up:**

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Ensure adequate ventilation.

#### 7. Handling and storage

**Handling:**

**Advice on safe handling:**

Provide good room ventilation even at ground level (vapours are heavier than air).
